Suprep Prep Instructions

- Avoid iron supplements for 5 days prior to your procedure.
- Avoid eating whole-grain bread/cereals with nuts/seeds and corn for 5 days prior to your procedure.

Stage 1

- Consume *clear liquids only* (see list below) the day before your procedure
- At 3:00pm the day before your procedure, take 2 Dulcolax tablets (5mg each)
- At 5:00pm the day before your procedure, pour a 6-ounce bottle of prep into the mixing container. *Using water*, continue to fill the container to the "fill line" (16 ounces). Drink the entire 16 ounces of prep and water within 15-20 minutes. Once this is complete, drink 2 additional 16-ounce bottles of water over the next 1 hour.
- Once Stage 1 is complete, continue to consume *clear liquids* until it is time for stage 2 of the prep.

Stage 2

- *6 hours before your scheduled procedure time*, open the second 6-ounce bottle of prep.
- Repeat the same steps as in Stage 1 but *be sure to complete this entire stage within 1 hour*.
- Once both stages of the prep are complete, you may continue to consume *clear liquids until 2 hours before your scheduled procedure time*.

Notes

- It may take a few hours for the prep to start working.
- It is normal to feel very full or bloated during your prep. *If you experience nausea and/or vomiting, wait 30 minutes before resuming prep/liquids. If vomiting does not disappear once you begin to move your bowels, please call us immediately for further instructions.*
